

SUPPORTING CANADA'S BEST ATHLETES IN THEIR PURSUIT OF HEALTH AND EXCELLENCE

Mayfair is an official sponsor of Calgary Olympians: Read more about our partnership with the Canadian Sport Centre Calgary, one of the top Olympic sport training environments in the world. Visit the [CSCC Web site](#).

CONGRATULATIONS KYLE!

Mayfair Diagnostics joins the rest of the country in congratulating Calgary athlete Kyle Shewfelt, who captured the gold medal in the men's gymnastics floor event and earned Canada its first-ever Olympic artistic gymnastics medal.

PLAYING WITH PAIN: MRIs SHOW WHEN TO SAY WHEN

Whether you're a weekend warrior or a Calgary Stampeders fan, an MRI can mean the difference between being in the action and recovering on the bench.

If you're an athlete playing with pain, the crucial question is whether to keep training and competing – hoping the injury will pass – or whether rest is the best medicine for keeping you active through the long term.

An MRI (or magnetic resonance imaging) scan may be your doctor's most effective tool in making that call. The technology uses magnetic fields and radio waves to get clear pictures of the human anatomy. Musculoskeletal MRIs are much more sensitive than conventional technology like X-ray, making them ideal for diagnosing just how serious an injury is.

MAYFAIR™
DIAGNOSTICS

MAYFAIR'S MRIs HELP ATHLETES STAY FIT

Mayfair Diagnostics is proud to be the official imaging services provider for the Canadian Sport Centre Calgary (CSCC).

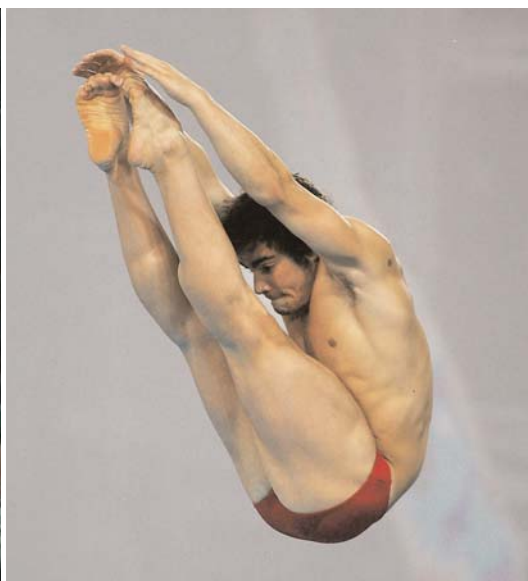

Through the CSCC, Mayfair serves Olympic athletes in the Calgary area, helping them maintain optimal health as they train and compete. "The health of our athletes is paramount, and to have a world-class health partner like Mayfair is a huge asset," says CSCC President Dale Henwood.

The musculoskeletal MRI is an invaluable tool for maintaining the performance of elite athletes. MRIs are a safe, fast and effective way of detecting delicate injuries in bones and softer tissues like muscle and cartilage. The detailed images

produced by the technology allow for quick examination and diagnosis, saving crucial time in determining if an injury requires immediate treatment or whether training can be resumed.

"If an athlete is able to train injury free, and they optimise their diet and nutrition, then really we're fine-tuning their body to handle the training loads required to achieve peak performance in the final show," says Dr. Victor Lun, Director of Sport Medicine for the CSCC.

Mayfair Diagnostics congratulates Calgary's Olympians for their outstanding efforts in Athens.

Prepare for space travel.

Cyberspace travel, that is.

Mayfair Diagnostics is pleased to announce the launch of our new Web site. There, you'll discover how our state-of-the-art MRI and CT technologies allow patients to travel forward in time and gain insight into the future of their health.

The voyage begins at www.mayfairdiagnostics.com

ENJOYING ENERFLEX WALK FOR MS

Mayfair Diagnostics was a proud Silver sponsor of this year's Enerflex Super Cities WALK for MS. The WALK was the smoothest in years, and even a downpour couldn't dampen the spirits of the generous volunteers who gave their time and enthusiasm to this important event. To date, nearly 2,200 Walkers have raised \$421,788.52 in pledges – the highest total in the Calgary WALK's 13-year-history!
